

Code Modification Proposal No.22 Response - British Gas Trading

22nd April 2026

Hi Stephen,

Hope this email finds you well.

Noting today's deadline, I have a few comments on proposed Modification #22:

- We are broadly supportive of the modification.
- The introduction of a monthly monitoring process is helpful, particularly the reference to contacting Shippers where there is a shortfall. The Mod report notes that "*The Transporter will not notify Shippers of any reduction in the RLCS.*" It would be beneficial if the drafting of 18.8.1 explicitly required the recalculated monthly position to be provided to individual Shippers in all cases. This would allow Shippers to proactively assess whether they wish to adjust their credit support in line with the updated RLCS.
- Given the tighter timescales for correcting any credit shortfall, we would encourage GMO to maintain clear and specific contact details for this purpose.
- From an operational perspective, we would welcome additional rigour around the GY cutover to ensure that Shippers' PLCS values are correctly allocated in PRISMA, helping to avoid any credit issues on 1 October.

I'm happy to discuss any of the above in more detail if helpful.

Best regards,

Claire
