Table of contents

A. Non-binding Demand indications	4
B. Demand assessment	5
C. Conclusion for the non-initiation of an incremental capacity project/process	6
D. Fees	7
E. Contact information	8

A. Non-binding Demand indications

The involved TSOs, National Grid and Premier Transmission Limited have not received any non-binding demand indications for firm capacity at the interconnection point between the entry-exit system of National Grid and the entry-exit system of Premier Transmission Limited for any future period.

The following application window has been included in this analysis:

- a) non-binding demand indications received within 8 weeks after the 1st July 2019

Therefore, the amount of zero for non-binding demand indications has been used as a basis for this demand assessment.

B. Demand assessment

The received demand indications within the current incremental process between the entry-exit system of National Grid and the entry-exit system of Premier Transmission Limited are zero. Since the potentially available capacity (i.e. technical capacity which is not yet booked in the long term) for the requested period are currently sufficient to cover potential future need for capacity.

C. Conclusion for the non-initiation of an incremental capacity project/process

According to the assessment result of the non-binding demand indications which indicated that no demand levels for incremental capacity exist, no incremental capacity project will be initiated.

Based on the aforementioned decision, no technical studies for incremental capacity projects will be conducted.

D. Fees

National Grid

A fee would have been required for the submission of any demand indications in accordance with UNC EID Section E, in order to fund technical design studies. As no demand indications were received, National Grid did not receive any fees for the evaluation and processing of non-binding demand indications

PTL

A fee would have been required for the submission of any demand indications in accordance with Section 4.2 of the NI Network Gas Transmission Code, in order to fund technical design studies. As no demand indications were received, Premier Transmission Limited did not receive any fees for the evaluation and processing of non-binding demand indications.
