

FORECAST ANNUAL RECONCILIATION PAYMENT

Q4 GAS YEAR 2022/2023

Forecast Annual Reconciliation Payments

- GMO NI are providing information on the actual licence revenue collected in the gas year to date and an estimate of the annual reconciliation payment due to/from Shippers to aid Shipper planning and budgeting during the gas year.
- This information is published on the GMO NI website in the month following each gas year quarter and is based on the following assumptions.
- Assumptions:
 - Forecast Required Revenue (FRR) of TSOs equal Actual Required Revenue (ARR) of TSOs *
 - Shippers actual capacity and volumes for the remainder of the gas year are in line with their forecasts
 - No auction premium charges are incurred for the remainder of the gas year
 - No entry overrun charges are incurred for the remainder of the gas year

*Mutual Energy's forecasts are an early estimate based on unbilled costs for Q4, a large proportion of which are costs passed through from 3rd parties which are outside the group's control. Some variations are therefore to be expected in Mutual Energy's final ARR which will be published at the start of November.

Forecast Annual Reconciliation Payments

GY2022/23	Q1	Q2	Q3	Q4	Total
	£'000	£'000	£'000	£'000	£'000
